P.S:In my opinion,Abdullah DURSUN and Recep SEKER are suitable candidates
for this position.
Abdullah Dursun has about 4 years of working experience on software engineering and
besides he will have a Master Degree on Artifical Intelligence in the year 2021.
He also knows English language in proffessional level.I think he is a
talented young person not to be missed.He looks like open to learn new things and improve hisself.
Recep SEKER also has 2 years of working experience but he got this experience form Simsoft
which is Apziva's partner firm.He also has english proficiency level.
